Ricky Chan. (Chan Wing Hin)

The Extraordinary Tech-Driven Entrepreneur

Hong Kong, New Territories 18-year-old, 2007 info@godotwebs.com

Introduction

Greetings, I am Ricky, a tech-driven entrepreneur specializing in web development, digital marketing, and business management. I am also the author of the book: Business & Marketing Essentials—You Read and Win¹. As a digital business enthusiast, I immersed myself in self-learning all the skills the craft an impeccable company, ranging from graphic design, marketing, to coding. My curiosity fuels my learning, and my learning will never stop.

Stanford University	September 2025	• Quick Learner
Top Up Learning Level of English attained: Advanced C1 (Accredited by the British Council) Competitions	June 2024	 Innovative
		• Enthusiastic about
		Tech & Business
		 Extraordinary
AWS AI Hackathon Hong Kong: Build Tomorrow's Hong Kong with AI Product: https://hktap.vercel.app	September - October 2025	problem-solving
	• Forward-thinking	
 Demonstrated strong determination, ambition, and endeavor. Smooth teamwork & exceptional collaboration and communication. 		• Active Talker
• Joined the development of the website and designed stunning elements & videos that elevated the product.		• Logical
Work Experience		

• HK\$20,000 Earned from Web Development

ERP System Development

Hong Kong Electronic & Mechanical Limited

Atop Development Company Limited

Me Time Catering Limited

• Incorporated digital solutions, including invoicing, CRM, accounting, inventory, etc, to streamline and accelerate daily business operations.

CRM & File Storage System Development

April 2024 - June 2024

August 2024 - September 2025

Systems Registrations Limited

• Self-coded internal system with the greatest flexibility and customizability. Next.js and Firebase are integrated to ensure quality and efficiency.

Projects

February 2025 QuLoad.Com

File-to-link converter

QuLoad is an open-source file-hosting web app that hosts files, specifically images or videos, and converts them to links. This allows you to use the link wherever you want with the greatest flexibility.

January 2025 MassMail.Dev

Mass mail service for email marketing

MassMail is a web-based mass mail service that serves digital marketers. As it is built based on Next.js, its speed is relatively faster than traditional web-based applications. It also allows you to connect with different SMTP servers. The steps for using MassMail are optimized, providing the best user experience among all the products in the market. It enhances not only the experience but also the efficiency of digital marketing.

October 2024 DotWebsHosting.Com

Web hosting service

DotWebsHosting consists of a self-developed hosting panel (DotWebsPanel v1.1) that provides free cloud hosting. It is also a hosting infrastructure I developed for personal use. This project also demonstrates my unique thinking and problem-solving, utilizing a Raspberry Pi 5 to build a full-scale cloud hosting service platform.

Education

HKU SPACE Po Leung Kuk Stanley Ho Community College

Higher Diploma in Business Management - Year 1

Tin Shui Wai Government Secondary School

Local Secondary School

- Treasurer of Commercial Studies Club (2023 2024)
